Food- and Veterinary Authority, Faroe Islands

Part 3. Vaccination Certificate

Valid vaccinations must not be more than 1 year old and must not be performed later than 4 weeks before the arrival of the cat to the Faroe Islands.

Kittens have to be 12 weeks old, before they are vaccinated and then have to wait 4 weeks before entering the Faroe Islands.

The undersigned authorized veterinarian certifies that the above mentioned cat has been vaccinated *lege artis* against feline diseases as follows not later than 4 weeks nor longer than 1 year before the journey to the Faroe Islands starts:

If the above-mentioned cat is a kitten, the undersigned authorized veterinarian certifies that the kitten was at least 12 weeks old when vaccinated:

Vaccination against:	Date:	Vaccine:	Batch no.:
Rabies			
Feline panleukopenia (parvovirus)			
Feline viral rhinotracheitis (herpesvirus)			
Feline calicivirus (calicivirus)			
Date	Place	Signature	Stamp

Part 4. Certificate by the Official Veterinarian

The certificate by the Official Veterinarian must not be issued earlier than 48 hours before the journey of the cat to the Faroe Islands starts.

The undersigned Official Veterinarian hereby certifies:

- That the above-mentioned cat is not exported from a country/area, that is under quarantine due to infectious diseases of livestock.
- That the veterinarian(s) certifying part 1, 2 and 3 of this health certificate is(are) authorized to do this by the veterinary authorities of the export country.
